- Ribbon

Wall Canvas

Do you ever wish that your canvases were strong enough to hold all the extra elements? As our canvases are made from wood they are strong enough to add as many elements and dimensions as you desired. There are four sizes available, designed to fit together for a creative display.

SB161 Small Canvas x 3

Kaiserwood - Coaster

Pearls - Bliss

Kaisercolour - Antique White

Vagabond Paper Collection

Flourishes - Curls

Take your wooden canvas pieces and carefully sand all edges smooth. Once you have chosen a paint to match your papers, paint all edges of the wooden pieces and set aside to dry. More than one coat of paint may be necessary if you have chosen a pale color.

1st Canvas – Using the “Wanderer” paper, decide which part of the design you wish to display and then cut it into a 14 x 14 cm square and adhere to one of the wooden canvases

2nd Canvas – Decide upon a photo to feature on this canvas and print it out. Crop the photo to a 14 x 14 cm square and again adhere to the next wooden piece.

3rd Canvas – Cut the following pieces

- 7 x 14 cm rectangle from Vagabond Traveler (blue side)
- 9 x 9 cm square of Vagabond Traveler (floral side)
- 7 x 14 cm rectangle from the Vagabond Gypsy

Place the two 7x14cm pieces, one above the other on the last wooden canvas and adhere a piece of red ribbon over the join in the centre.

Take your small square coaster and paint around the edges with antique white. Set aside to dry and then cover this coaster with the 9x9 piece of patterned paper and carefully trim the rounded corners.

To create the three dimensional effect on this piece we have adhered a small flat piece of wood under the coaster to give it extra height.

Paint a wooden flourish in a co-ordinating color and adhere to the top of your canvas, just underneath the top of the coaster.

Add a few pearls above the ribbon on either sides of the coaster to complete you project.

Tips

Experiment with the angle you crop your photo down to create a more artistic feel.

Ideas

If you like the distressed look you could also paint, ink or sand around the edges of your wooden canvases.
